

EIPOS initial prototype creation

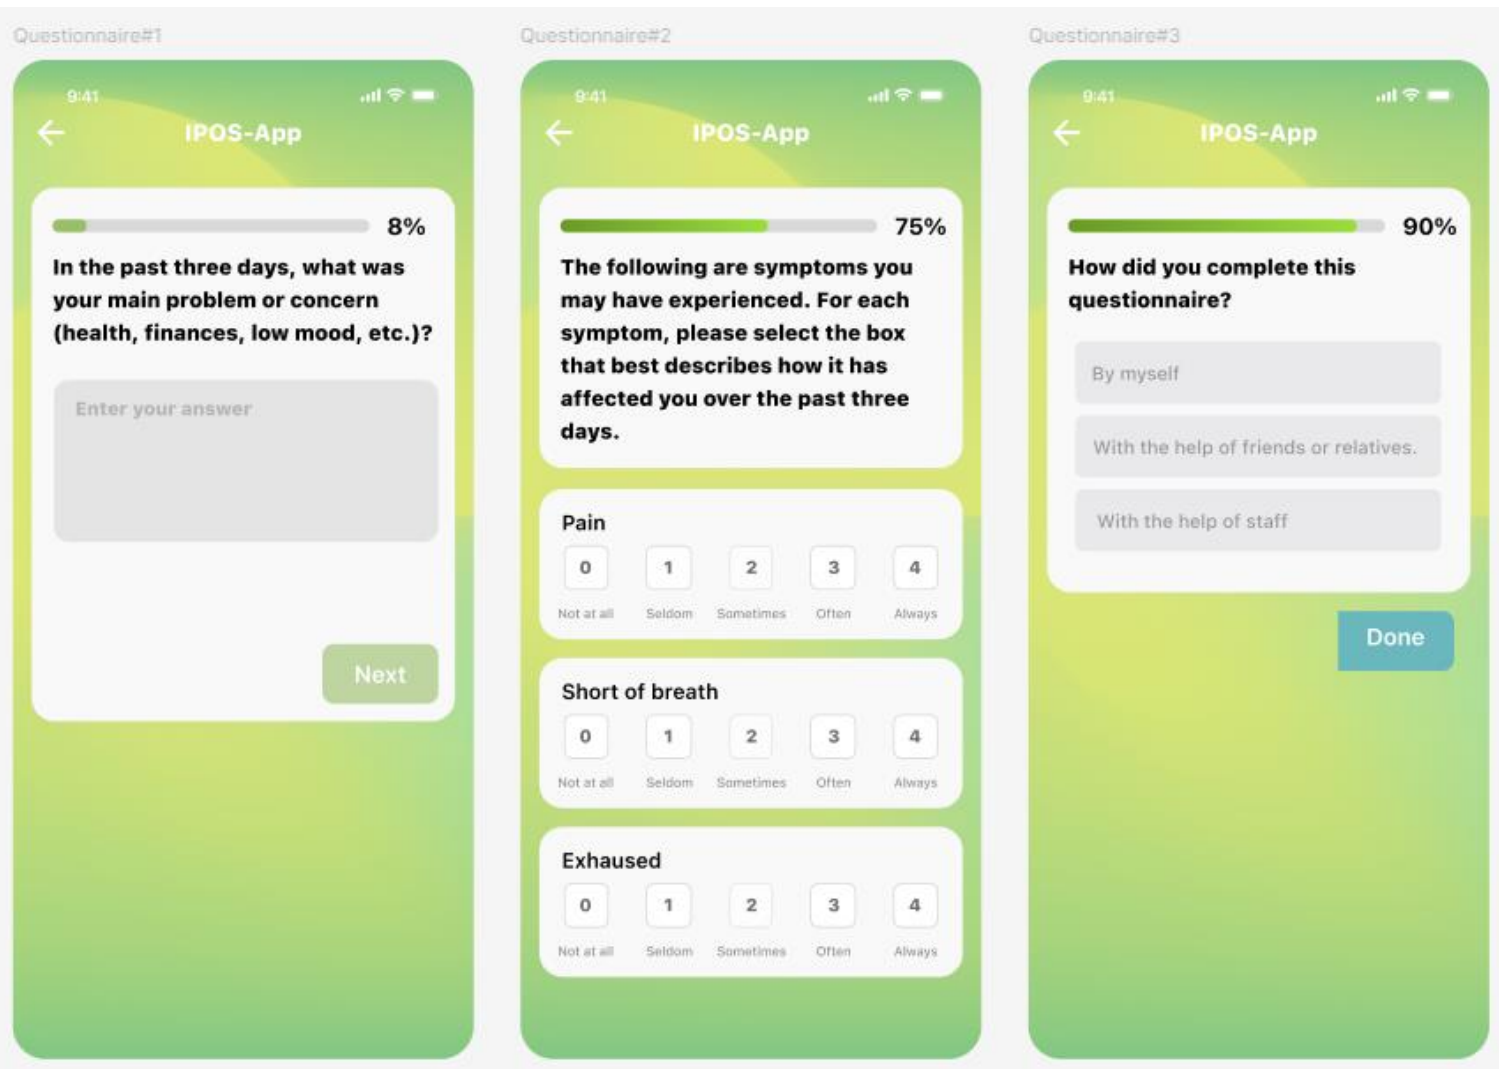

Regular Login Page with language selection

- Register page with FaceID Function / Fingerprint

- The app will start with asking user about their identity , it can also be changed in the setting page
- Homepage is including all the function: Last time report review, a portal for user to insert their body condition (and cancer parts?)
- Also the status of the questionnaire

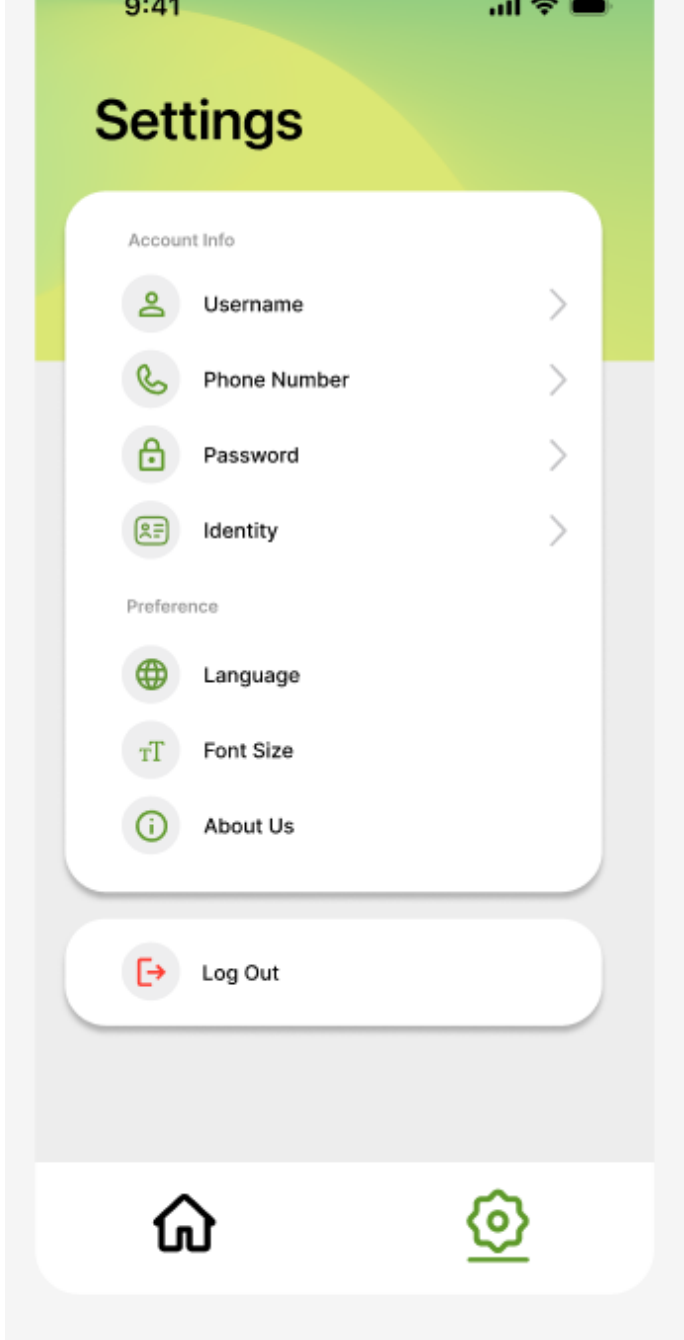

- How the 3 types of question being shown in the application

- The generated report including medical advice, body score, score history blah blah blah. It can be added more content depends to your demands

Pie Chart Example

Label	Value	%
Label 1	12	28.6%
Label 2	22	42.9%
Label 3	12	28.6%
Label 4	12	28.6%
Label 5	7	14.3%
Label 6	7	14.3%

Patients List

Identity	Name	Patients ID	Distributed Questionnaire	Completed	Status
	Chan Tai Man	2011198448R	3 Pcs	2/3 Pcs	
	Lee Sum Yi	2011198448R	3 Pcs	2/3 Pcs	
	Chan Kin Hoi	2011198448R	3 Pcs	0/3 Pcs	

- The management board for either webpage or ipad app, I prefer ipad UI since its easier for medical staff to manage and also a better vision ppl to watch.
- And again, it depends on your requirement.
