Explanation:

The E-IPOS System login interface allows users to securely access their accounts by entering their patient ID and password, with options for language selection, role selection and account registration. Fingerprint and Face ID log in is also allowed

2. Home Page

Explanation:

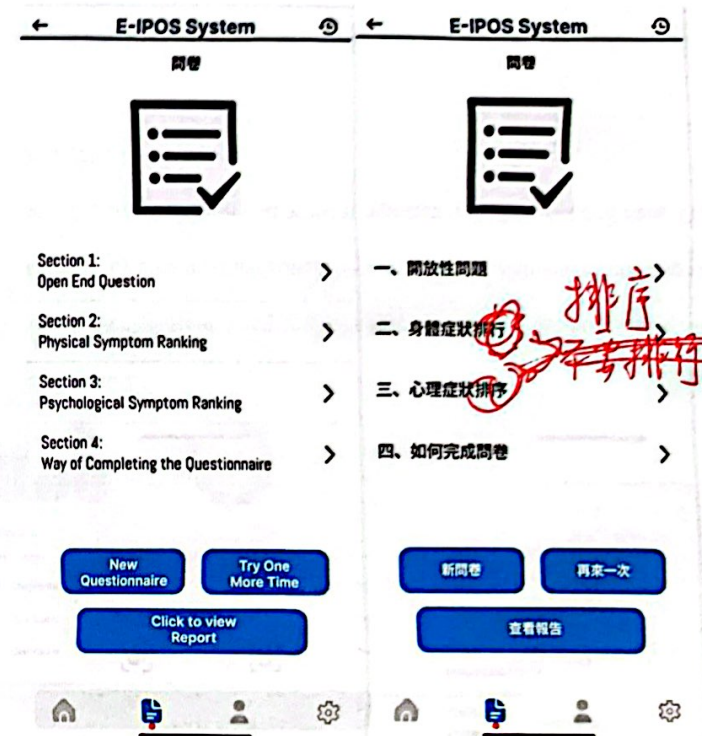

This home page of the E-IPOS System allows users to select functions from the home page and will redirect them accordingly.

1. ~~Interview 用中文版, 英文版留俾自己用~~
2. ~~每個身份用不同顏色~~

1. 可以留俾中文版 interviewee 用, 英文版留俾 review 用

2. 可以每個身份用不同顏色的介面區分

3. Questionnaire Selection Page-2nd Version

Explanation:

The Questionnaire page offers two primary functions:

1. Questionnaire: Users can begin a new questionnaire or retake one to assess their health status. The Patients can select different sections according to their needs to direct get to the questions.
2. Medical Report: Users can view their medical report if they have completed the questionnaire.

4. Questionnaire Based Feedback Test

● Open End Questions-2nd Version

The image shows two side-by-side screenshots of the E-IPOS System interface for Open End Questions-2nd Version. The left screenshot is in Chinese, asking: '在過去的三天內，您主要面對的問題或擔憂是什麼（健康、經濟、情緒低落等）？'. The right screenshot is in English, asking: 'In the past three days, what was your main problem or concern (health, finances, low mood, etc.)?'. Both screens feature a text input field labeled '輸入您的答案' (Enter your answer) and navigation buttons: '返回' (Return), '跳過並返回首頁' (Skip and return to home page), and '下一個問題' (Next question). A red circle highlights the '跳過並返回首頁' button on the Chinese version.

Explanation:

This page of the E-IPOS System presents a questionnaire, prompting users to describe their main problem or concern from the past three days using an open end question. Users can enter their answers, navigate to the next question, or return to the home page.

● Ranking Questions-2nd Version

The image shows two side-by-side screenshots of the E-IPOS System interface for Ranking Questions-2nd Version. The left screenshot is in Chinese, asking: '對於每項症狀，請選出一個最能描述過去3天它對您有影響的等級。' (For each symptom, please select one level that best describes how it has affected you over the past 3 days). The right screenshot is in English, asking: 'For each symptom, please select the box that best describes how it has affected you over the past 3 days.' Both screens feature a list of symptoms with a rating scale from 0 to 4. Handwritten red notes are present: '身體' (Body) and '選題項' (Select item) on the Chinese version, and '經常' (Often) on the English version. The symptoms listed include: 胃痛 (Stomach pain), 腹瀉 (Diarrhea), 氣喘 (Asthma), 疲勞或乏力 (Fatigue or weakness), 反胃 (Nausea), 嘔吐 (Vomiting), 食欲不振 (Loss of appetite), 行動不便 (Reduced mobility), 便秘 (Constipation), 鬱鬱欲睡 (Sleepy), 胃痛 (Stomach pain), 腹瀉 (Diarrhea), 氣喘 (Asthma), 疲勞或乏力 (Fatigue or weakness), 反胃 (Nausea), 嘔吐 (Vomiting), 食欲不振 (Loss of appetite), 行動不便 (Reduced mobility), 便秘 (Constipation), 鬱鬱欲睡 (Sleepy).

Explanation:

This page presents a questionnaire asking users to rate the impact of various symptoms experienced in the past three days through a ranking question. Users select levels for each symptom, then can proceed to the next question or return to the home page.

The picture can be scrolled down when using in phone app.

5th	40

Chan Tai Man
Male 40 ~~Years Old~~

Based on your answers, you have the following symptoms:

- 1.
- 2.

Based on your score, the ~~medical~~ advice given is as follows:

- 1.
- 2.

Report Generation Time: 2024-12-25 12:40

This page displays reports from the E-IPOS System for the patient, presenting diagnostic and medical information. Scores are calculated based on questionnaire responses; a lower score indicates better health. Conversely, a high score indicating serious symptoms. The page also provides descriptions of potential illnesses and recommended advice for the patient based on their situation.

The patients can also see how the scores went based on their previous records.

6. Personal Info Page

1. 姓名 2. Gender 3. 年齡 4. 腫瘤部位 5. 電話號碼 6. HKID

姓名: 趙伯 (修改)
電話號碼: 12345678
身份: 患者
患者: 肺部
Main Cancer Sites: Lung

Save changes

the questionnaires and contact them if serious symptoms have appeared.

8. Health Carer Interface for Workers

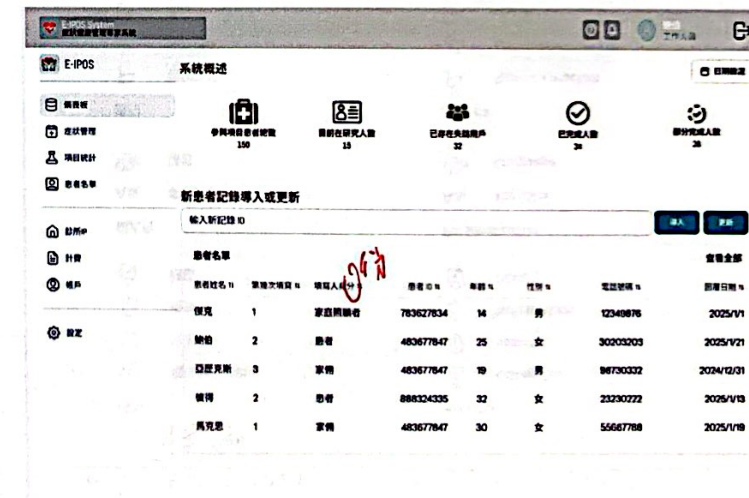

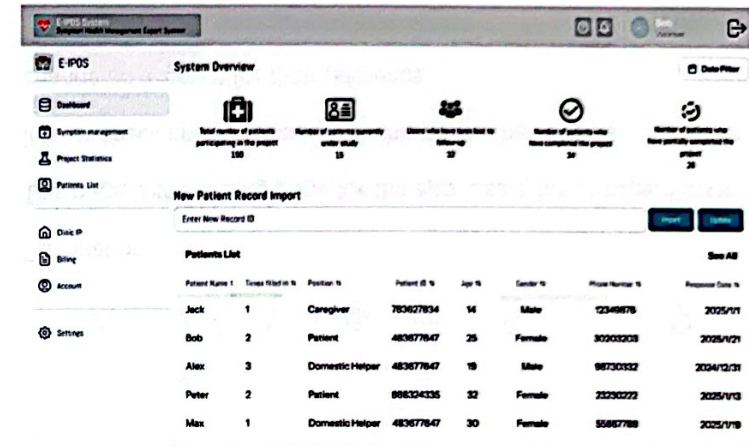

● Mobile App Version-2nd Version

Explanation:

This page is an example page of the app version for the E-IPOS System that display project summary and statistics, including total participants, patients currently under study, and numbers of users lost to follow-up and those who have completed the project. Navigation options for symptom management and patient lists are also provided. These functions are for the care workers or workers at the hospital so they can see the performance of the patients on

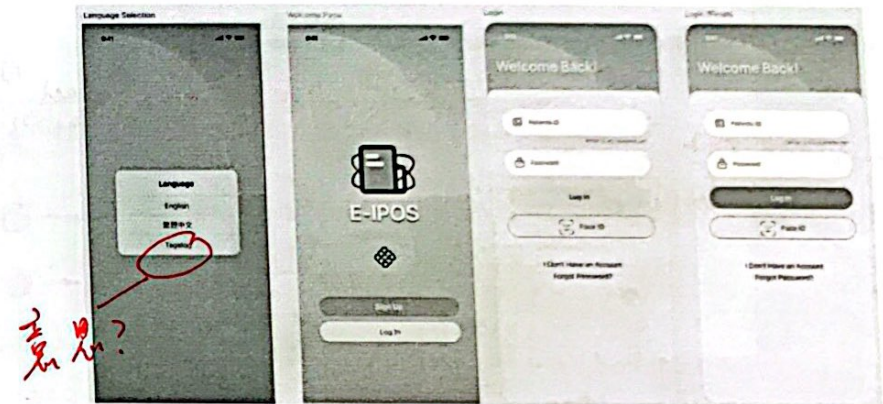

● Web Interface/iPad Page-2nd Version

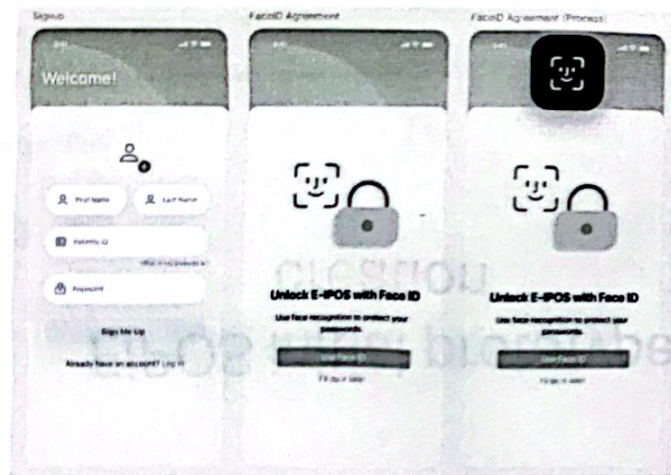

Explanation:

EIPOS initial prototype creation

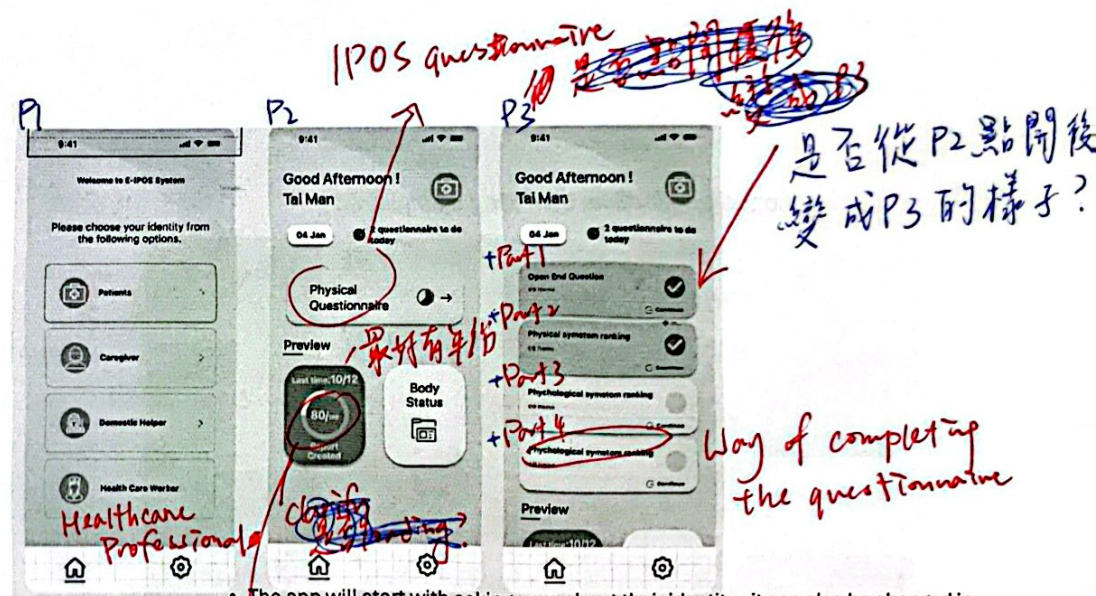

Cyrus

Regular Login Page with language selection

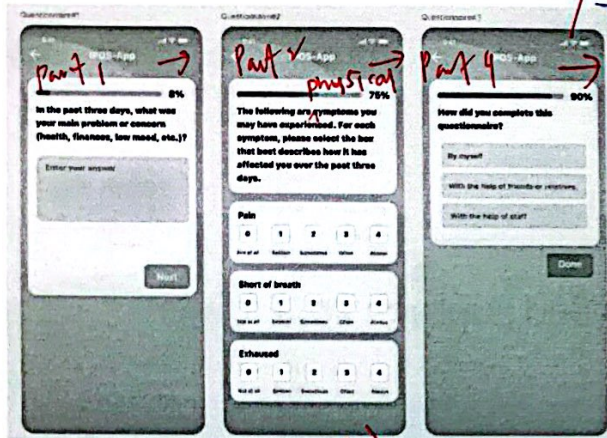

- Register page with FaceID Function / Fingerprint

- The app will start with asking user about their identity, it can also be changed in the setting page
- Homepage is including all the function: Last time report review, a portal for user to insert their body condition (and cancer parts?)
- Also the status of the questionnaire

需要呢個功能
寫返有咩主要症狀

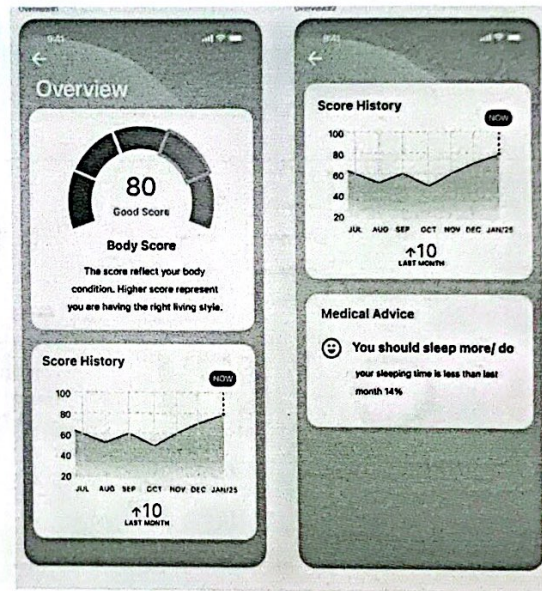

~~Part 1 and Part 2~~

下頁

- How the 3 types of question being shown in the application

拒絕回答。
然後再問不想回答的原因。
e.g. 不想答, 身體不舒服, 其他, 和之前差不多 etc

開多一個選項
↓ copy & paste 1個 psychological version

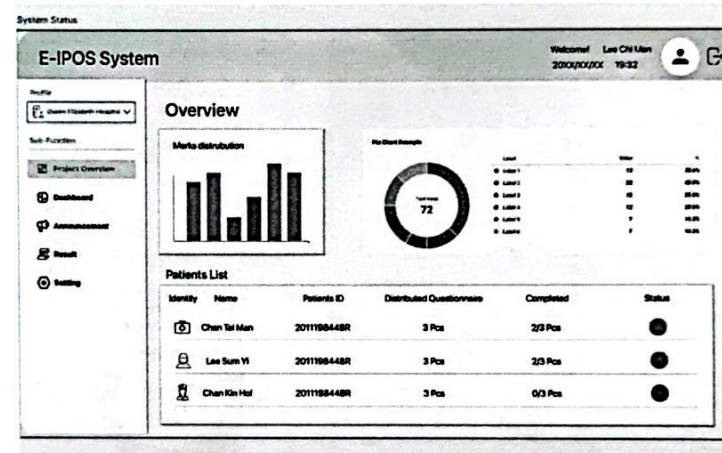

- The generated report including medical advice, body score, score history blah blah blah. It can be added more content depends to your demands

除了總分, 還要設計時有什麼問題

Setting page

- The management board for either webpage or ipad app, I prefer ipad UI since its easier for medical staff to manage and also a better vision ppl to watch.

- And again, it depends on your requirement.
